**Allowance**

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to the claimed improvement, Malik discloses:  
modifying an A-number field to be transmitted from the conversion/transmission center in the telecommunication network to the second telecommunication terminal in connection with the call by one of adding control information to the A-number field and replacing the A-number with the control information; and  
controlling the actuating device in accordance with the control information contained in the modified A-number field (see columns 11-12).

Malik doesn't reveal:  
sending a dialing string including the B-number and subscriber-specific optional parameters from the first telecommunication terminal to the conversion/transmission center to initiate the call;  
determining, at the conversion/transmission center, the

Art Unit: 2645

B-number and the subscriber-specific optional parameters from the dialing string received from the first telecommunication terminal (see Figure 3); and

wherein the control information comprising at least a portion of the subscriber-specific optional parameters in the dialing string sent to the conversion/transmission center from the first communication terminal to initiate the call.

**Note:** Furman, U.S. Patent No. 5,465,295 (hereinafter Furman) discloses the claimed dialing string (see Figure 3). However it isn't obvious to modify Malik with Furman because both inventions are non-analogous. While Malik is concerned with controlling an actuating device, Furman is geared towards routing telephone calls to different destinations.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
